Digital Portfolio

<https://mlan225.github.io/portfolio/>

My name is Marvin Anderson, and I am a software developer living in Lexington, KY. My technical experience stems from my undergraduate degree at UK, professional work in Lexington, and personal projects to further expand my knowledge. I am very familiar with having to learn and use many different languages and development tools in order to complete my tasks.

Education

University of Kentucky, Lexington, KY 40508.

Aug 2013 – August 2017

Major: Information and Communication Technology, Bachelor of Science

Experience & References

eLink Design, Lexington, KY

April 2018 – Jan 2020

Web Developer

Member of a development team that consistently delivered websites to spec for clients. Work ranged from the development/maintenance of websites to long term upgrades to a proprietary system. Both tasks required knowledge PHP, Symfony2, and Doctrine for backend and HTML, CSS, JS, JQuery/Vue for the front end. Additional experience includes SQL data structuring and web hosting/server management through Cpanel.

Xometry, Lexington, KY (formerly MakeTime)

August 2017 - March 2018

UX Data Analyst Intern

Analyze user analytics data to measure the usability of our UX design and discuss my findings weekly in product meetings with the UX lead and CPO. In addition, I implement analytics and assisted in the development of features throughout the company platform. My experience here focused heavily on Javascript for development and SQL as a means of querying analytics data.

Awesome Inc, Lexington, KY

Feb 2017 – Aug 2017

Team Alpha Developer

Participated in Scrum meetings, Developed websites for clients, and maintained the Awesome Inc main sites. In my time there, I created an intro level Jekyll course to aid future developer Interns. Additional experiences include Wordpress development and front end development with HTML, CSS, and JS.
